## About CAFET-INNOVA Tech Society, Hyderabad

CITS is an international non-profit organization helping scientific community by organizing International / National Conferences, Workshops, & Guest Lectures etc. It also is publishing International Journals in the fields of Earth Sciences and Engineering, Biological Sciences and Engineering, Industrial Electronics and Robotics and an exclusive International Journal for UG and PG students.

## BACKGROUND

Biodiversity is the "living foundation" for sustainable development. It is essential to understand the process of making biodiversity sustainable and the technique to be adopted for its use. Sustainable use of biodiversity is measured as direct-use value, indirect-use value and non-use value. Protection and sustainable use of biodiversity requires the participation of policy makers in areas like agriculture, forestry, fisheries, energy, tourism, trade and finance. The loss of biodiversity by human activities threatens our food supplies, opportunities for recreation and tourism, and sources of wood, medicines and energy. This conference brings the advanced methods for conserving biodiversity for sustainable developments from experts and young talents.

## About NIT Rourkela, INDIA

The National Institute of Technology, Rourkela is one of the leading brands in technical education in India and an Institute of National Importance. The institute is situated at the North Western tip of Odisha (a state of eastern India), in a scenic environment surrounded by majestic hills and lash of greens. The Department of Biotechnology and Medical Engineering was established in 2007 in pursuance of the development of intellectual resources for sustainable growth and betterment of the society. The department is involved in generating quality human resources through its various academic and research programs. The department currently has undertaken two consultancy projects on biodiversity studies and several externally funded research projects in tissue engineering.
