About the Conference

Department of Metallurgical and Materials Engineering, National Institute of Technology is going to organize the 6th edition of International Conference on Processing & Characterization of Materials (ICPCM 2024) to provide a platform for scientific and industrial collaboration. ICPCM is an adaptation of National Conference on Processing and Characterization of Materials (NCPCM) which started in the year 2011 and subsequently being organized annually. This conference has been a great success in multiple facets such as effective knowledge sharing, technology transfer, academia-industry interaction, research networking and so on. Researchers from academia, laboratories, and Industry personnel across the globe will deliver talks on diverse advancements in materials processing and characterization. The conference will also provide an opportunity for the young researchers to develop concepts from distinguished Scientists, Engineers, Researchers and Technocrats.
