

NITR organizes international conference on ‘Innovative product design and intelligent manufacturing system’

Rourkela: National Institute of Technology, Rourkela organized the first two days international conference on ‘Innovative product design and intelligent manufacturing system’ on Friday. Inaugurating the event the director of NITR professor Animesh Biswas said, “ This conference discusses the current issues that are facing in industries. In this conference, a wide range of fields like computer science, electronics, electrical, automation, robotics, 3D printing, mechatronics will be covered. Hope this will help researches in enhancing their skills in this field “. He wished all the success of the conference. Professor Bibhuti Bhusan Biswal, director of NIT Meghalaya and the professor at the industrial design department told, “Industrial design involves the design and development of industrially produced items. The department is very new in comparison to other departments but grew like a tree. With the help and support of the mechanical department. Professor Saroj Kumar Patel stated about the importance of the conference. He wished all the participants all luck. Professor Dayal Ramakrushna Parhi, head of mechanical engineering department spoke about the relevance of intelligent manufacturing system . Professor BBVL Deepak, head of the industrial design department coordinated the event. In this two days conference total of 132 researchers present their papers on subjects like innovative product design and intelligent manufacturing systems.
